

## Meet Tarbiyah

Tarbiyah brings your family's reading, routines and plans together.

Home is the main screen.

Steps: Home is your main screen. Use the Dock to choose an app.

## Choose where to go

### Choose an app for what you want to do.

Home: See the day and prayer schedule at a glance.

Quran main screen: Open the Mushaf and check Quran reading tasks and progress.

Mushaf (inside Quran): Read the Quran, explore meaning, and listen or follow along.

Adhkar: Read or listen to collections of duas.

Review: Review progress toward goals and objectives; prayer reports and Quran task progress are the currently supported examples.

Books: Choose a book, read and return to your saved place.

Family Organizer: See family events and tasks, plan ahead, and report completed tasks.

Steps: Quran has a main screen and the Mushaf inside it. They are two areas of the same app.

## Start with what you need

Start with the activity you need. You can read without first making a task.

Quran main screen: open the Mushaf and check reading tasks and progress.

Mushaf inside Quran: reading, meaning and listening. Same app, not a second Dock app.

Steps: Choose the lesson for the activity you need. You can start reading without creating a task.

## Begin setup

Setup helps Tarbiyah use your family's location and preferences.

Enter your name, then choose Begin.

Steps: Have your name, a device name, prayer location and preferred prayer settings ready. The device may prepare content before showing the welcome screen. Enter your name, then choose Begin. This example uses Amina. Use your own family details throughout setup.

## Name this device

Give this device a name you will recognize.

Name your device

DEVICE NAME

Rahman Family

Back

Next

The example device name is Rahman Family. Choose Next.

Steps: Enter a device name you will recognize, then choose Next. This example uses Rahman Family.

## Check the connection

Check the connection before continuing.

The connection is ready. Choose Continue.

Steps: Follow the network screen. Choose Wi-Fi opens the device network setup. Use Check again when offered, then Continue once the connection is accepted.

## Set the prayer location

Set the place used for your family's prayer times.

Choose the place your family prays from most often.

If Wi-Fi is unavailable, you can still set the city manually and refine it later.

|                                         |                                              |                    |
|-----------------------------------------|----------------------------------------------|--------------------|
| <small>CITY</small><br>New York         | <small>STATE / PROVINCE</small><br>          |                    |
| <small>COUNTRY</small><br>United States | <small>TIME ZONE</small><br>America/New_York |                    |
| Back                                    | Find my location                             | Keep this location |

Check the city, country and time zone before keeping this location.

Steps: Check City, Country, State / Province where needed, and Time zone. This example uses New York, United States and America/New\_York. Check the result before choosing Keep this location. Find my location is an alternative when it returns a usable result.

## Review prayer preferences

Check the prayer settings your family follows.

### Choose the prayer tradition your family follows.

Calculation method, the asr method, and adhan

Remove

Maryam

Child

Remove

Back

Skip for now

Continue

Scroll the roster to check Yusuf and Maryam as children. Choose Continue.

Steps: Enter a Name, choose a Role, then Add member. Repeat for each person and check the roster before choosing Continue. This example adds Amina and Omar as parents, and Yusuf and Maryam as children. Skip for now is available if you are not adding members yet.

## Open Home

Choose Open Home when setup is ready.

Choose Open Home.

Home appears with the family name and prayer schedule.

Steps: At Your Home is ready, choose Open Home. Wait for Home to appear.

## Return to unfinished setup

If setup was interrupted, continue from the setup screen the device offers.

Choose family routines

Choose the routines Tarbiyah should track before you invite the people who share it.

Salah ☒

Quran ☐

Adhkar ☐

Back Skip for now Keep these routines

This example returns to Choose family routines after the Home preferences were saved.

Steps: Check the displayed values before continuing. A saved setup step can be restored; do not assume every unsent change was saved.

## Read the message

Read the message before repeating an action.

Steps: A preparation screen is different from a form waiting for your input. Do not reset the device just because preparation takes time.

## Retry the appropriate step

If an action could not be saved, correct the issue shown and try that step again.

Steps: Follow the message shown. For network readiness, use Check again when offered. If a separate startup failure offers Try again, use it on that screen.

## Check completion

Finish by checking that Home opens.

Home is open after setup completes.

Steps: If the device remains in setup or shows an error, completion is not yet confirmed.

## More help

Steps: Continue offline, when offered, is a recovery route. Follow any remaining connection or location message; not every feature works offline. This setup ends with Open Home. Use the separate Settings/Household guidance for later phone pairing.

Home lessons: orientation, opening apps, controls and personalization.
